

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-4. (Cancelled).

5. (Currently amended) A portable electronic device, comprising:
a CPU;
a transceiver coupled to said CPU, said transceiver capable of wireless
communications;
a memory unit coupled to said CPU; and
an image capture device coupled to said CPU, said image capture device
acquires an image;
wherein said transceiver wirelessly transmits said image to a remote
storage device through an intermediate electronic device; ~~The~~
~~portable electronic device of claim 1~~
wherein said transceiver begins transmitting said ~~images~~ image when said CPU determines said memory to have reached a threshold.

6. (Original) The portable electronic device of claim 5, wherein said threshold is programmable.

7. (Original) The portable electronic device of claim 6, wherein said transceiver is further capable of Bluetooth wireless communications.

8. (Currently amended) The portable electronic device of ~~claim 1~~ claim 5, wherein said transmitter of said portable electronic device may receive images from said remote storage device.

9. (Original) The portable electronic device of claim 8 wherein said transceiver is further capable of Bluetooth wireless communications.

10.-39. (Cancelled).

40. (Currently amended) A method for remote data storage and retrieval for portable electronics, comprising:

- (a) acquiring an image with a digital camera;
- (b) transmitting said image to cellular telephone using Bluetooth wireless communications;
- (c) further transmitting said image to a cellular network using 3G wireless connection, wherein said cellular network is also connected to the Internet; and
- (d) further transmitting said image to a remote storage device, wherein said storage device is also connected to the Internet; ~~The method of claim 36~~

wherein said digital camera further includes a central processing unit ("CPU") and memory, and [[:]] wherein the transmission of said image begins when said CPU determines said memory to have reached a threshold.

41. (Original) The method of claim 40 wherein said threshold is programmable.
